

I am a subscriber to XM Satellite Radio and a listener of its traffic and weather channels. These are services that I pay for. I understand that the National Association of Broadcasters is attempting to limit my ability to listen to these channels and is lobbying the FCC in an attempt to dictate the choice of channels and programming available to me. The NAB has no right nor business to attempt to limit my programming choices on *subscription based* services. I respectfully urge the FCC to reject NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and indeed PAY for.
